Lithuanian *kárštas* 'hot', *kaĩštis* 'heat', Latvian *kaĩsts* 'hot', *kaĩsēt* 'warm up, inflame, arouse, instigate', (*\*kor-s-*); wherefore as 'stormy, hot tempered' also Lithuanian *keĩštas* 'rage, fury', *kerūs, keringas* 'full of rage', *kĩšti* 'become angry'; probably to Old Indic *kuṣāku-* 'burning; fire, sun' and *kaṣāku-* 'fire, sun' (both Middle Indic from *\*k̑̌šāku-*;

compare Armenian *xaršem* 'cook, burn' from intensive *\*khr̥s-*); compare Mühlenbach-Endzelin Latvian-D. Wb. I 375, II 164.

A cognate root form *krā-s-* as 'fire brilliance, blaze, glow', from which partly 'red', partly 'luminous, bright, beautiful', in Old Church Slavic *krasa* 'charming, pleasing, winning, agreeable, beautiful, pulchritude', russ. *krasá* 'beauty, adornment, jewellery', Old Church Slavic *krasъnъ* 'nicely, pleasantly, whitely dressed', russ. *krásnyj* 'red, beautiful', Czech *krásný* 'beautiful', old also 'light, gleaming' and 'reddish' (etc.); Latvian *krāsus* 'beautiful' is russ. loanword

Maybe alb. Geg *kreshnik* 'noble man, lord' a Slavic loanword.

One seeks a root *ker-* widened to *\*k(e)r-em-* in Latin *cremō*, *-āre* 'to burn, consume by fire (tr.)', Umbrian *krematra* Pl. *\*crematra* 'kind of vessel to the roast of the meat, roast';

in addition as 'decoct, extract a substance through boiling' also *cremor* 'to burn, consume by fire, a thick vegetable juice'; further gall. κόρμα, κοῦρμι, Old Irish *coirm* n., mcymr. *cwrwf*, acorn. *coref*, *coruf* 'beer', wherefore perhaps Old Indic *karam-b(h)á-* m. 'cereal, grain, porridge, mash', *kulmāṣa-* m 'sour mucus of fruits, sour rice mucus'; compare further Tocharian B *kark-*, *kärk-* 'fry, roast'.

**Material:** Old Indic *kákhati* (Gramm.) 'laughs'; Armenian *xaxank* 'laughter', gr. καχάζω (from \*χαχάζω) 'laugh loudly'; Latin *cachinnō*, *-āre* 'to laugh aloud, laugh immoderately', *cachinnus* 'laughter'; (under the influence of common Celtic *-ns-*, *-nt-* > *-nn-*), Old High German *kachazzen*, *kichazzen*, Old English *ceahhettan* 'laugh loudly'; Old Church Slavic etc. *chochotati* ds.; compare Lithuanian *kikénti*, *kiknóti* 'giggle'.

Similar to onomatopoeic words *kāk-* 'flout, show scorn, mock' in gr. κηκάζω 'abuse, revile'; Old High German *huohōn* 'mock, scoff', Old Saxon *hōhi-līk* 'laughable'; with Germanic *-k-*: Old English *hocorn* 'derision'.

-----

\*) According to WP. I 341, 348 f., 399 mentioned roots *khād-* 'bite', *khābh-*: *khōbh-* 'feeble', *khenə* 'dig' are not to be proved as Indo Germanic, just as little as those from Specht (Indo Germanic Dekl. 263, Anm. 4) set *khā-mo-* 'crooked';

those mentioned by him (see 256) Old Indic Beispiele *khalati-*, *kharva-*, *khara-*, *khaṇḍa-*, *khora-* are all not of Indo Germanic origin. Old Indic *khādati* 'bites to pieces, chews', npers. *xāyad* ds., could belong to Armenian *xacanem* 'bite', but also with secondary

expressive Aspiration as *\*kṛd-* to Lithuanian *kándu* 'bite' (somewhat different above S. 560).

To the same root **ken-** (above 559 ff.) could belong Old Indic *khánati* 'digs', Inf. *kháni-tum*, participle *khātá-* (*\*khṛ-to-*), together with the neologisms *khá-* n. 'cave', *ā-khú-* 'mole', *khā-* 'stream, brook' = Avestan Nom. Akk. Pl. *xā* ds.; Old Indic *khaní-* 'burrowing', f. 'mousehole, entrance to the burrow of a mouse' = Avestan *kani-* 'ditch, trench, channel'; Avestan Old pers. *kann-* 'dig' (*k-* from *kh-* from the compounds with *us-*, *ham-*).

Maybe in **-m-** formant etymology in alb. Tosc f. (*\*kamur-is*) *hamuridhe* 'mole' > Geg m. *urithi* 'mole'; common alb. Avestan *k-* > *h-*.

Note:

The inanimate suffix **-ur-**: alb. Tosc (*\*kamur-is*) *hamuridhe* 'mole': 'Ἰλλυριοί', οἱ, Illyrians, 'Ἰλλυρία', ἡ, Illyria, also 'Ἰλλυρίς', ἡ, Adj. 'Ἰλλυρικός', ἡ, ὄν, Illyrian: -κή, the region or province of Illyria, 'Ἰλλυρίζω', speak the Illyrian language, 'Ἰλλυριστί'.

The anlaut from gr. *kāphān*, *κηφών* 'drone', *κωφός* 'dull, deaf' is doubtful, also from Church Slavonic *chabiti* 'spoil', *chabenъ* 'woeful, wretched, miserable', as also the from Church Slavonic *chomq-tъ* 'horse collar', placed by Specht to Latin *hāmus* (*\*khā-mo-*) 'hook', gr. *χαμός* 'writhed, crooked, humped' (and *χαβός* ds.) (different above S. 555).

About the problem of the Tenuis Aspiratae, which is to be understood partly indeed as secondarily expressive, compare Hj. Frisk, Göteborgs Högsk. Arsskr. 1936: 2, S. 38 ff., Specht Indo Germanic Dekl. 251 ff. For Slavic beginning *ch-* compare V. Machek Slavia 16 (1938), 161 ff. and J. J. Mikkola Urslav. Gramm. 174 ff.

Gr. *πρᾶνις*, mostly Pl. *-ίδεξ* 'phren', which would prove the initial sound as *kʷ*, is doubtful in its affiliation, because the suitable meaning from Old English *mid(h)rif* is probably based on the first part of the compound;

it would have to be then *πρᾶνις* a short form to a similar composition; after Vendryes RC 44, 313 ff., Specht KZ. 68, 193 ff. would be Indo Germanic \**kʷerp-* taboo metathesis to \**perkʷ-* 'life, world, oak' (Gothic *faírhuus* 'world').

### Root / lemma: *kers-2*

**Meaning:** to run

**Material:** For palatales *k̥* speaks σάρσαι ἄμαξαι Hes., as Latin *sarrācum*, *serrācum* (Italian -*rr-* from -*rs-*) `a foreign chariot' could have originated Illyrian *\*sarsa* = Indo Germanic *\*k̥rsā*;

Note: [*k̥* > *s*- satem: Maybe pre-Illyrian substrate satem?]

gr. ἐπικούρος `to help hurrying' (*\*k̥orsos*);

Note:

The inanimate suffix **-ur-** : gr. ἐπικούρος `to help hurrying' : Ἰλλυριοί, οἱ, Illyrians, Ἰλλυρία, ἡ, Illyria, also Ἰλλυρίς, ἡ, Adj. Ἰλλυρικός, ἡ, ὄν, Illyrian: -κή, the region or province of Illyria, Ἰλλυρίζω, speak the Illyrian language, Ἰλλυρία:--hence Adv. Ἰλλυριστί.

Latin *currō*, -*ere* `run' (*\*k̥rsō*), *cursus* `run, flow', *currus* `cart', *equirria* `chariot race' (*\*equi-currīa*, from which assimilatorisch *\*equi-quirria* and Haplogistic *equirria*);

alb. *karrocë* `cart' a Latin loanword.

Middle High German *hurren* `move quickly'; doubtful Old High German *hros*, -*ses*, Old Icelandic Old Saxon *hross*, Old English *horg* `horse, steed' (*\*hrussa-*), Old Low German *hers* ds. (*\*herssa-*), because **-ss-** from one has understood in **-s** auslaut root maximally as consonant increase in a shortened name; hence rather to a dental extension (: Old Indic *kūrdati* `hops, jumps') the not palatalen root (*s*)*ker-* `spring';

Armenian *kaṙk* `cart' is probably loanword from Galatian.

'limewood, linden', Modern High German dial. *lind*, *lint* n. 'bast';

probably Lithuanian *lentà* 'board' ('of limewood, linden?');

with *o*-grade Slavic *\*lptъ* in russ. dial. *lut*, *luty* 'linden bast', klr. *lút'én*. 'linden bast; willow branches', *lút* 'horsewhip, skin';

perhaps as 'the bending, winding' Old High German *lind*, *lint* (*\*lento-s*), Old Norse *linnr*, *linni* m. 'snake', (under the influence of common Celtic *-ns-*, *-nt-* > *-nn-*), poet. 'tree, celebration', *linn-ormr* 'dragon' = Old High German *lindwurm* 'lindworm, wingless dragon, dragon'.

Maybe truncated alb. *llap* 'chat, talk, speak'.

It seems that from **Root / lemma: *plab-*** : (to babble, etc..) derived **Root / lemma: *lep-1*** : 'chat, talk, speak'.

presumably as *\*lēpagi-* 'sayer of a magic spell', Old Irish *līaig* (disyllabic), Gen. *lego* (*\*lī-ago*) 'physician, medicine man' (keinesfalls to Gothic *lēkeis*);

russ. *lepetátb* 'stammer, babble, chatter, babble', Old Bulgarian *lopotivъ* 'stammering, stuttering', russ. *lopotátb* 'babble, rant, roister, gossip', with somewhat other meaning Serbo-Croatian *lepétati* 'flutter'.

Maybe alb. *llomotit* 'babble' a Slavic loanword.

Perhaps based on the onomatopoeic words, but with *a*-vocalism, gr. λαπίζω 'swagger, rodomontade', λαπιστής 'swaggerer, bragger' and λαίλαψ 'whirlwind' (as 'howling').

an other possibility would be a borrowing of gr. and Italian words not from Indo Germanic but Mediterranean language. The relationship to *lep-* `split off ' as `cleaved stone piece ' (*saxum* : *secō*) is possible.

gr. ἐλεύθερος `free' from *\*lehu<sup>h</sup>ero-s* = Latin *liber* `free'

Maybe Illyrian TN *Liburni* [common Latin -d<sup>h</sup>-> -b-].

Latin liber > Italian libero, Spanish libre, French libre, Bolognese lèbber, Furlan libar, Albanian (\*i-liure) i lirë, Illyri (Albanian tribe), Catalan (\*i-liure) Iliure, Valencian (\*i-liure) Iliure, Welsh (\*di-lyffethair) dilyffethair, gr. ἐλεύθερος `free'.

Note:

Common Greek e-, Avestan a- : Occidental Romance languages e-, a-, i- prefix = Albanian pronoun a- prefix, feminine adjective e-, masculine adjective i- prefix.

Note:

The inanimate suffix **-ur-** : Welsh (\*di-lyffethair) dilyffethair, Greek ἐλεύθερος `free' : (\*iliuri-) Ἰλλυριοί, οἱ, Illyrians, Ἰλλυρία, ἡ, Illyria, also Ἰλλυρίς, ἡ, Adj. Ἰλλυρικός, ἡ, ὄν, Illyrian: -κή, the region or province of Illyria, Ἰλλυρίζω, speak the Illyrian language, Ἰλλυρία:--hence Adv. Ἰλλυριστί. (common Greek - Illyrian -li- > -ll-).

alb. i *lirë* `free' = Iliuri `free people';

Faliscan *loferta* `a freedwoman';

Maybe Tocharian A *lyutāri* `the upper (men), overseer?' (Duchesne-Guillemin *BSL* 41, 181).

alb. perhaps *lenj* `is born, comes into being' (\*le<sup>h</sup>ud<sup>h</sup>-n-), *lind* `give birth', (\*po-lem) *po-lem* `people' (le<sup>h</sup>ud<sup>h</sup>-m-); Also *lindje* `sunrise'. (common Slavic alb. *pe-*, *po-* prefix).

Note:

*lenj* `is born, comes into being' seems wrong etymology since from **Root / lemma: le<sup>h</sup>gh-** : to put down; to lie down, woman in childbed.

Alb. *vëla* `brother' (\*sue<sup>h</sup>-lo<sup>h</sup>ud<sup>h</sup>ā `member of clan') [common alb. *sv-* > *v-*, see alb. *vjehërr* `father-in-law'].

Note:

alb. *vëlla* `brother' : **Phrygian: vela-** f. `family, relatives' (?) : Estonian *veli* `brother'. According to alb. cognate derived from the **Root / lemma: sue-lo<sup>h</sup>-**, **sueh<sup>h</sup>li<sup>h</sup>o<sup>h</sup>(n)-** [(*\*sue* `his, her' + **Root / lemma: le<sup>h</sup>ud<sup>h</sup>-1** (\*le<sup>h</sup>ugh-): to grow up; people; free].

]: (a kind of relation): (\**svila-*) *vëlla* 'brother' [common alb. initial **sv-** > **v-**].

**Etymological comments:** Possibly, goes back to PIE \**suel-*, cf. Hes. ἀέλιοι οἱ ἀδελφὰς γυναικας ἐσχηκότες, αἴλιοι σύγγαμβροι 'brothers-in-law, whose wives are sisters' and εἰλίονες at Pollux 3, 32 (οἱ δὲ ἀδελφὰς γήμαντες ὁμόγαμβροι ἢ σύγγαμβροι ἢ μᾶλλον συγκηδεσται καὶ παρὰ τοῖς ποιηταῖς εἰλίονες), which may represent metrical lengthening of \*ἐλίονες or \*έλίονες. Cf. also ON *svilar* 'id.' and Gr. ἤλιξ (Dor. ἄλιξ) 'friend, associate', Brixhe - Drew-Bear 1997: 90. Less probable is Orel's (Orel 1997: 108) rendering of οὐελας as 'heat of the sun' (Gr. εἴλη).

Albanian *vëlla*: Phrygian: *vela-*: Estonian *vend*, *veli*: Finnish *veli*: Saami *viellja*: ON *svilar* 'brother'.

**Uralic etymology:**

**Proto:** \*welje

**English meaning:** brother, friend

**Hungarian:** -*vel* 'with' (case suffix), *vel-em* 'with me', *vel-ed* 'with you', *vel-e* 'with him, with her'

Alb. *këlüşh* 'youngling';

**Note:**

This seems erroneous etymology because alb. *këlüşh* 'cub, esp. young dog' derives from

**Root / lemma:** *kel-6*, *k(e)lē-*, *k(e)lā-* or *kļ-*? : 'to call, cry'. (see above)

In Sanskrit, the name Manu appropriately came to mean "man" or "mankind" (since Manu, or Noah, was the father of all post-flood mankind). The word is related to the Germanic Mannus, the founder of the West Germanic peoples. Mannus was mentioned by the Roman historian Tacitus in his book Germania. Mannus is also the name of the Lithuanian Noah. Another Sanskrit form. manusa is closely related to the Swedish manniska, both words meaning "human being."

The same name may even be reflected in the Egyptian Menes (founder of the first dynasty of Egypt) and Minos (founder and first king of Crete). Minos was also said in Greek mythology to be the son of Zeus and ruler of the sea.

The English word "man" is thus also related to the Sanskrit manu, as well as its equivalents in other Germanic languages. Gothic, the oldest known Germanic language, used the form Manna, and also gaman ("fellow man").

The name Anu appears in Sumerian as the god of the firmament, and the rainbow was called "the great bow of Anu," which seems a clear reference to Noah (note Genesis 9:13). In Egyptian mythology Nu was the god of waters who sent an inundation to destroy mankind. Nu and his consort Nut were deities of the firmament and the rain. Nu was identified with the primeval watery mass of heaven, his name also meaning "sky."

**Root / lemma:** *oktō(u)*

**Meaning:** eight

**Note:**

**Root / lemma:** *oktō(u)*: eight derived from the extended **Root / lemma:** *ok-*: 'to think over, \*understand, see, count' + *-ta* attribute formant modelled after Illyrian attribute nouns, adjectives. Hence PIE numbers derived from previously ordinal numbers.

**Material:** Old Indic *aṣṭā, aṣṭāu* (besides *aṣṭī*- f. 'eighty'), Avestan *ašta* to Avestan *ašti*- 'width of four fingers' (to Sg. *\*ašta*-), Henning TrPhSoc. 1948, 69; Armenian *ut* 'probably from *\*optō* with *p* assumed from **seven** *p*); gr. ὀκτώ; alb. *tetë* (*\*oktō-t*);

**Note:**

Anatolian languages show a pattern similar to alb. So Lycian *aitāta* 'eight': alb. *teta* 'eight'; Lycian *ñuñtāta* 'nine': alb. *nanda* 'nine'. Therefore alb. *shtata* 'seven' derived from a truncated *\*sa(p)tata* 'seven' later Old Indic *saptáthaḥ*, Avestan *haptaθa-*, Old Saxon *sivotho*, Old English *seofodā*, Lithuanian *septiñtas*; also Old Indic *saptatī*, Avestan *haptāiti*- 70; in alb. *-ta, -të* are attribute formants that were solidified in Anatolian and Indic cognates. The attribute *-ta* formant (used in the genitive and adjectives) is unique to alb.-Anatolian languages alone.

Therefore alb. *teta* 'eight' is a zero grade of Lycian *aitāta* (*\*oktō(u)ta*) 'eight'. It was initially an ordinal number used as an attribute [compare Latin *octuāgintā* '80'].

A better explanation is the fact that Anatolian languages used the Akkadian script which did not permit 2 subsequent consonants, therefore a vowel was introduced between the double consonants found in:

Maybe the oldest cognate is Luvian: (<*hu-wa-ya-al-li*) <*huwayalla/i-* 'Epithet of the Sun-god'.

gr. hom. ἥλιος, Attic ἥλιος, Doric ἀέλιος, ἄλιος, Cretan ἀβέλιος Hes. (i.e. ἄΦελιος) 'sun', further formations of n. *\*sāuel* to m. *-io*-stem (compare Old Indic *sūrya-*); Latin *sōl*, *-is* m. **IE cognates:** Skt. *sūrya-*, Latin *sōl*, Go. *sauil*

**Notes:** The change of meaning in OIr. is understandable from the mythological context.

'Sun' is viewed as 'the eye of the Sky'. It appears that there was still an ablauting paradigm in PCelt., Nom. s. \**sāwol*, Gen. \**sūl-os*, from which OIr. *súil* was abstracted

**Note:**

[conservative definitive forms versus indefinite forms (alb. phonetic trait)], hence alb. geg *sūni*, Tosc *syri* (\**sūlni*) 'eye': Old Irish (\**sāuel-*) *súil* 'eye'

Erroneous etymology, the Celtic name for eye derived from Romance languages contaminated by Satem languages the shift *k-, g- > -s-*:

German	Auge
Italian	occhio
Spanish	ojo
French	œil
Aragones	güello
Asturian	güeyu

Also Estonian *silma* 'eye' : Finnish *silmä* 'eye'

Other alb. cognates (Gjakova dial.) (\**huuēln*) *uvill*, [Buzuku] (\**üviln*) *yill* 'star', [Sirmie] Pl. *ulini* 'stars'.

Yet the shift of initial (\**s<sub>ɣ</sub>e-* > *de-*) is a common alb. phonetic shift. See **Root / lemma:** *s<sub>ɣ</sub>ergh-* to take care of; to be ill. Hence alb. *dergjem* (\**s<sub>ɣ</sub>erghjō*) 'be bedridden, be sick'.

Therefore alb. (\**s<sub>ɣ</sub>el*) *diell* 'sun' probably derived from a root \**s<sub>ɣ</sub>el*.

A better explanation is the common alb. celtic Genitive Case:

English	Sunday
Albanian	e di-el
Breton	di-sul ; Sul
Catalan	diu-menge
Cornish	de-Sül
Latin	Solis dies
Welsh	dydd Sul ; Sul

Hence alb. *diel* ` Sunday ' > *diell* ` sun '.

Gothic *sauil* n. (\**sōwila-*), Old Icelandic *sól* f. (\**sōwulā*) `sun', Old Icelandic *and-sǽlis*, aschw. *and-sylis* `the sun **zugewendet**'; doubtful the rune names Gothic *sugil*, Old English *sygel*, *sigel* from proto Germanic \**sugila-*, ablaut. with Old Saxon *swigli* `bright, radiating' from \**swegila-*, Old English *sweg(e)* n. `sky, heaven, sun', *swegle* `bright, radiating' from \**swagila-*;

Baltic \**sāuēliā* f. in Lithuanian Latvian *sáulē* `sun ';

Slavic \**sulnika-* n. in Old Church Slavic *слнѣце* `sun ' (-*ni-* from \**ogni* `fire');

2. In **-en-**stem:

Avestan *x̌əng* `the sun' (Indo Germanic \**s̥uēn-s*), Gen. from *hvarə*, Gothic *sunno* (Dat. *sunnin*, neutr. after *sauil*), Old English *sunna*, Old High German *sunno*, *sunna* `sun', (under the influence of common Celtic *-ns-*, *-nt-* > *-nn-*), wherefore as `sonnseitig = südlich' Old Icelandic *suðr* `south', Adv. `southward ', Old English *sūðerra*, Old Saxon *sūthar-liudi* (`southern people'), Old High German *sundar* `south', Adv. `southward ', Middle High German *sund* `south' etc. (Modern High German *Süd* from Low German).

Gujarati *surdj* `sun'

Perhaps Tocharian A *swāñce*, *swāñco*, Tocharian B *swāñcai* `ray [of light], (sun) beam' reflect Proto Tocharian \**swāñcai* which is possibly (with Hilmarsson, 1986a:263-95, *in nuce* Pisani, 1942-43a:29) related to Proto-Germanic \**sunθa-* `sunny' > `south' and \**sunno* `sun' (cf. P:881-2; MA:556). The two Germanic words would reflect PIE \**suh<sub>a</sub>nto-* (a derivative of \**seh<sub>a</sub>weh<sub>1</sub>/suh<sub>a</sub>n-* `sun') and, with "particularizing" *-n-*, \**suh<sub>a</sub>ntōn-/suh<sub>a</sub>nten-/suh<sub>a</sub>ntn-*. The attested paradigm of Germanic \**sunno* reflects a conflation of the *o*-grade and the zero-grade stems (\**suh<sub>a</sub>ntn-* > \**sunθn-* > \**sunn-*). For Hilmarsson, the Tocharian forms represent a generalization of \**suh<sub>a</sub>nten-*, further derived by the addition of *-ai-*.

Note:

The root *\*suh<sub>a</sub>nten-* is an attribute noun created in the same way as adj. and ordinal numbers:

Anatolian languages show a pattern similar to alb. So Lycian *aitāta* (*\*oktō(u)ta*) 'eight' : alb. *teta* 'eight'; Lycian *ñuñtāta* 'nine' : alb. *nanda* 'nine'. Therefore alb. *shtata* 'seven' derived from a truncated *\*sa(p)tata* 'seven' later Old Indic *saptáthaḥ*, Avestan *haptaθa-*, Old Saxon *sivotho*, Old English *sefoða*, Lithuanian *septiñtas*; also Old Indic *saptatí-*, Avestan *haptāiti-* 70; in alb. *-ta*, *-të* are attribute endings that were solidified in Anatolian and Indic cognates. The attribute *ta* (used in the genitive and adjectives) is unique to alb. language alone.

Therefore alb. *teta* 'eight' is a zero grade of Lycian *aitāta* (*\*oktō(u)ta*) 'eight'. It was initially an ordinal number used as an attribute [compare Latin *octuāgintā* '80'].

That means Slavic *\*sulnika-* n. in Old Church Slavic *slъnъce* 'sun' (*-ni-* from *\*ogni* 'fire') is phonetically equal to Tocharian A *swāñce*, *swāñco*, Tocharian B *swāñca-* 'ray [of light], (sun) beam', hence Slavic forms were created according to attribute nouns and are late creations.

Maybe gr. 'Απόλλων, -ωνος; various dialectic forms: 'Απέλλων (Doric), 'Απειλων (Cypriot), Αἴπλου (Thessalian). - Seit J. Schmidt KZ 32, 327ff. all are linked to Cretan ἀβέλιος Hes. (i.e. ἄΦελιος) 'sun'. It seems that the sun god 'Απόλλων derived from Cretan ἀβέλιος Hes. (i.e. ἄΦελιος) 'sun'. The common in gr. λι > λλ has taken place. Both 'Απέλλων (Doric), 'Απειλων (Cypriot), Αἴπλου (Thessalian) and Cretan ἀβέλιος Hes. (i.e. ἄΦελιος) 'sun' derived from the same root *\*sāh<sub>u</sub>el* 'sun' where the common gr. *hw* > *p*, *gw* > *b* has taken place.

Note:

Khaskura *gham* (also Indic borrowing *surj*) 'sun', Gypsy Gk *kham* 'sun' : gr. ἄΦελιος reflect gr. *-b-* > *-mb-* > *-m-*.

Maybe Etruscan *avil* 'year' a borrowing from gr. ἄΦελιος.

**Note:**

**Root / lemma:** *septm* (\**sek<sup>w</sup>h-*) : seven derived from a mutated **Root / lemma:** *syeks, seks, kseks, ksyeks, ueks* (: *uks*) : six; common gr.-celt. *k<sup>w</sup> > p, g<sup>w</sup> > b*.

Alb. *shtata* 'seven' from (\**s[e]ptm-ti-*) is not possible. Anatolian languages show a pattern similar to alb. So Lycian *aitāta* (\**oktō(u)ta*) 'eight' : alb. *teta* 'eight'; Lycian *ñuñtāta* 'nine' : alb. *nanda* 'nine'. Therefore alb. *shtata* 'seven' derived from a truncated \**sa(p)tata* 'seven' later Old Indic *saptāthaḥ*, Avestan *haptaθa-*, Old Saxon *sivotho*, Old English *seofōða*, Lithuanian *septiñtas*; also Old Indic *saptatí-*, Avestan *haptāiti-* 70; in alb. -*ta*, -*të* are attribute endings that were solidified in Anatolian and Indic cognates. The attribute suffix -*ta* is used in the alb. genitive and adjectives.

ordinals: **sept<sub>em</sub>mos** in Old Indic *saptamá-*, npers. *haftum*, gr. ἑβδομος, dial. ἑβδεμος (die extension derives from a form ἑβδος, compare Old Church Slavic *sedmъ*), Latin *septimus*, gall. *sextametos*, Old Irish *sechtm-ad*, cymr. *seithfed* (\**sept<sub>em</sub>-etos*), Old Lithuanian *sėkmas*, Old Prussian *sep(t)mas*, Old Church Slavic *sedmъ*; \**septm̥-to-s* in Old Indic *saptáthaḥ*, Avestan *haptaθa-*, Old Saxon *sivotho*, Old English *seofoda* (also akzentuell = *saptátaḥ*, besides Old High German *sibunto*, Old Saxon *sivondo*, Old Norse *siunde*, *siaunde*), Lithuanian *septiñtas*.

### Note:

The root **Root / lemma: *skēi-*** : (to cut, separate) is detrimental for alb. language because alb. people chose it to design clear speech: alb. (*\*skei-b-*), *shqip* 'clear speech, separated words', (*\*skipta*) *shqipto* 'speak clearly', (*\*skipta*) *shqiptar* 'people who speak clearly'. Alb. people employed these cognates during Turkish long occupation to preserve their language. Hence people who didn't speak clearly were ostracized by the majority of alb. so important became the clear Indo European language to alb. that they finally switched from the name Arban (Alban) to (*\*skipta*) *shqiptar* 'people who speak clearly'. Other alb. derivatives: (*\*Schäbe*) *shkabë* 'eagle (with sharp talons)', alb. Geg (*\*scipioni*) *Shqipni* 'land of eagles'. Obviously alb. association of (*\*skipta*) *shqiptar* 'people who speak clearly' and (*\*skipion*) *shqiponjë* 'eagle' was distorted by Illyrian soldiers serving in the Roman army. Illyrians who didn't speak Latin translated the Roman military ensign with the eagle as: *scipio -onis*, m. 'a staff, wand' = alb. (*\*scipioni*) *shqiponjë* 'the eagle (itself)', also alb. (*\*scipioni*) *Shqipni* 'land of eagles'. When **Gergj Kastrioti** 'king of Epirus' presented his heraldic emblem of the eagle (the double headed imperial eagle) he inadvertently changed the name of his people. Illyrian emperors had introduced the double headed eagle of their Hittite heritage.

**Root / lemma:** *syeks, seks, kseks, ksyeks, yeks* (: *uks*) (\**ghe-ska*)

**Meaning:** six

**Material:** Old Indic *ṣaṭ* (from *saṭs*), Avestan *xšvaš*, Armenian *veç* (in *vat'sun* '60' is *a* from *e* umgelaute); gr. ἑξ, dial. ἑξ (knidisch ξέστριξ '6-lined barley', maybe from \*ξεξ); alb. [attribute noun] *gjashtë* 'six';

[common alb. *gh-* > *gl-* > *gj-*: lith. *gh-* > *dz-*], hence alb. *gjashtë* 'six' from an ordinal number (\**gheks-ta*): Old Indic *ṣaṭ* 'six', *ṣaṣṭhá-* 'sixth' was initially an ordinal number.

**Note:**

Anatolian languages show a pattern similar to alb. So Lycian *aitāta* (\**oktō(u)ta*) 'eight': alb. *teta* 'eight'; Lycian *ñuñtāta* 'nine': alb. *nanda* 'nine'. Therefore alb. *shtata* 'seven' derived from a truncated \**sa(p)tata* 'seven' later Old Indic *saptáthaḥ*, Avestan *haptaθa-*, Old Saxon *sivotho*, Old English *seofōða*, Lithuanian *septiñtas*; also Old Indic *saptatī-*, Avestan *haptāiti-* 70; in alb. -*ta*, -*të* are attribute endings that were solidified in Anatolian and Indic

cognates. The attribute *ta* (used in the genitive and adjectives) is unique to alb. language alone.

Therefore alb. *teta* 'eight' is a zero grade of Lycian *aitāta* (\**oktō(u)ta*) 'eight'. It was initially an ordinal number used as an attribute [compare Latin *octuāgintā* '80'].

Alb. Tosc *nanta*, Geg *nanda* 'nine' derived from Lycian *ñuñtāta* 'nine'.

Slavic, Germanic, Baltic languages follow illyr-alb. attribute *-ta* ending.

**Note**

Centum languages prove that **Root / lemma:** *upér, upéri*: `over, above' derived from an older **Root / lemma:** *\*hukwér, \*hukwéri*: `over, above', later the old laryngeal was lost. What becomes clear is the common gr.- celt. *-kw-* > *-p-*. Therefore **Root / lemma:** *upér, upéri*: `over, above' derived from the same root as the cognates for horse. Old Church Slavic: *nevěsta* 'bride, daughter-in-law' [f ā] derived from Lithuanian *nau-vedà*, -*vedỹs* 'bridegroom'

Iterat. Lithuanian *vadžióti* and *vadyti*, Latvian *vadīt* 'guide, lead', and *vadāt* 'him and her guide, lead'; about Lithuanian *vadúoti*, Latvian *vaduoť* 'auslösen, loskaufen'; see above S. 1109; Old Church Slavic *voždq*, *voditi* 'guide, lead', Old Russian *voditi ženu* 'eine Frau heimführen'.

In addition probably *\*ued-mno-*, the word for the purchase price the bride:

Gr. ἑδνῶν (for \*Fḗδnov with Spir. asper after \*Fhāδύς 'pleasant'), hom. Pl. ἑδνα 'bride-price or wedding-gifts'; but also 'dowry of the parents', ἑδνώω, hom. ἑδνώω 'to promise for wedding-presents, to betroth', hom. ἑδνώτης 'a betrother; (the daughter equipping) father of the bride', ἄν-ἑδνος 'without bride-price; also of the husband, bringing no gifts' (ἄ[F]ἑδνος and ἑ[F]ἑδnov with α and ε as suggestion vowels);

Old English *weotuma*, *wituma*, *wetma* m. 'purchase price of the bride', Old Frisian *wetma*, *witma* ds., Burgundian *wittemo*, Old High German *widomo*, *widemo* 'dowry', Middle High German *wideme*, *widem*, Modern High German *Wittum* (in addition Old High German *widimen*, Middle High German *widemen*, *widmen* 'ausstatten', Modern High German *widmen*); gr. Slavic -*no-* maybe from -*mno-* and with dem Germanic -*men-*stem comparable; dubious Old Church Slavic *věno* 'dowry, payment for the bride', whether from \**uedno-*, compare also \**uesno-*;

doubtful alb. *vigjē* 'gift to the wedding, to the birth of children, by the construction of a house' (*ued(h)-l-?*). common alb. *-dz-* > *-gl-*, *-gj-*.

#### Note:

Wrong etymology because alb. *ura* 'bridge' derived from a truncated gr. γέφυρα (\**géphura*) 'bridge', Armenian Կամուրջ *kamourg* 'bridge'. Also alb. *udhë* 'way, journey' did not derive from Old Indic participle *ūdḥá-* 'lead' but from gr. ὁδός, ἡ (οὐδός once in Hom., Od.17.196): l. 'of Place, way, road'.
